Dear

I am writing to you regarding the application to the railway site off horton street and surrounding areas and the meeting on Friday 14th December . At such short notice at this time of year and more importantly the time when most people are at work and the parents grandparents who have to pick up children from school is of concern as it looks like there will be no objection to the proposed site being used for buildings.

I object strongly with this development on the grounds of the congestion, safety of surrounding residents when large vehicles carrying large loads up a single road on Brunswick street and Horton street .Also how are they going to deal with the noise, pollution etc. This is one area of heckmodwike that provides wildlife of birds bats ,newts , red kites, foxes and many more wildlife and this is also not being addressed also.
