25th July 2018

Dear Sir/Madam,

<>Cummins Turbo Technologies , St Andrews Road , Huddersfield , - Discharge conditions 5 (materials), 6 (landscape/ecology), 9 (surface water drainage) on previous permission 2017/92268 for erection of extensions , alterations to roofs and elevations and installation of sprinkler tank and pump house

Thank you for consulting Yorkshire Water regarding the above proposed development. We have the following comments:

The letter prepared by Farrar Bamforth Associates Ltd (entitled Condition 9 - Surface Water Drainage not dated) is acceptable.

In summary, the report states that there will be no additional surface water proposed to the combined sewer network as the proposed sprinkler tank and pump room are no longer being built on the green area.

Given the above comments, Yorkshire Water has no objection to the discharge of condition 9.

Yours faithfully

Stephanie Walden
Land Use Planning Manager
