**PLANNING STATEMENT  
IN  
SUPPORT OF PROPOSED RECLADDING OF FAÇADE  
TO BAYS 9 and 10  
FOR  
CUMMINS TURBO TECHNOLOGIES  
ST. ANDREW'S ROAD  
HUDDERSFIELD  
HD1 6RA**

The applicant, Cummins Turbo Technologies, is part of the global Cummins Group operating on this site in the design and production of turbo-charges for use in the automotive industry.

As part of a wider scheme of improvements and refurbishment of existing buildings, the applicant is proposing to reclad the façade of buildings which front onto St. Andrew's Road.

This application is for a revised proposal for these recladding works, previously approved under application number 2017/92268

Existing view north along St. Andrew's Road

Existing view south along St. Andrew's Road

## Materials

The horizontal and vertical cladding is to be undertaken in Kingspan Microrib Architectural wall panels.

Horizontal cladding will be in Anthracite (RAL 7016), vertical cladding will be in Goosewing Grey (RAL 080 70 05 BS 10A05)

View representative of material

The existing brickwork is to be coated with a thin coat CorkSol render in dark grey
