Address of the site or building:	Brookfield Farm, U Can Recycling Ltd, Brookfields Road, Wyke, Bradford, BD12 9LU
Postcode:	LS7 4ND

User comments

Type of comment: An objection
I sent an email on 15 May 2016 in regard to application 2016/91287 that referred to the same development and documented my objections at that time. Not a great deal has changed since then as vehicles have been using Brookfields Road to access UCan Recycling since that date. The following is the letter I sent to Kirklees Planning and I have sent it again as my objections have not changed. I am vehemently opposed to the change of use of agricultural buildings to an IT recycling business for the reasons stated below. I have recently noticed the increase in the number of heavy duty vehicles travelling up and down Brookfields Road, which is a quiet residential cul-de-sac. I believe that if this planning application is approved it will destroy the tranquility of a peaceful residential street, not to mention the wear and tear of the tarmac which in the winter months doesn't receive gritting. There are numerous houses on this street with young children who play on the street due to the quietness of the street and HGVs traversing up and down would create dangers that have currently not been of any concern. The street is also inhabited by many retired citizens and are right on the path of said HGVs thundering up and down. I have resided on Brookfields Road for the past years and its peaceful and quiet location are what led me to move here from a busy main thoroughfare. This application would change a peaceful residential estate effectively into an industrial estate with large vehicles polluting the air and tranquility of the area. Please do NOT let the application proceed.
