Address of the site or building:	adj, 33, Greenhead Lane, Dalton, Huddersfield, HD5 8PP
Postcode:	

User comments

Type of comment: An objection
The closeness of the building to the boundary of _____ will reduce light into the property and privacy due to the rear door on the unit been directly inline with my _____ windows and door. What will be the hours of opening of this unit as a very quite neighbourhood on coach house drive and this unit will increase the noise levels from cars and people. The carbon omissions from several cars been in the carpark and engines been run Causing high carbon omissions coming into environment specially garden areas. Increase in noise levels from retail unit due to car doors and shop door been opened and closed. We have a large variety of wildlife in the trees owls bats and squirrels. The trees are protected and surely the impact of tarmac drive and parking spaces will damage the root system due to diesel from tarmac been absorbed into the ground. The plans doesn't state the high of surrounding fencing enhance the ground level is much lower on _____ and this will reduce natural light and making the rear of the property extremely dark.
