Type of comment: An objection
We are not happy with the height extension to this building as it is blocking light to our houses (and the building itself isn't a pretty site. Also, we do not want anymore windows put in to this property as it is invading our privacy, especially with little children playing in the garden, you can see directly in to our garden from the first floor windows. The windows that have been installed in the loft area wasn't in the original application as I recall. Thanks
