Dear Sirs

With regard to the above planning reference for the addition of a ground floor window and an additional bathroom window on the side elevation we would like **object** on the following grounds.

These windows directly overlook our property and although we have no objection to an additional bathroom window for the ensuite bathroom we strongly object to a living room window being put on this side as it would directly overlook our property and destroy the privacy that we have had for many years, this new window is for a living room and not an occasional room and would mean people in the living room would directly look onto our property an invasion of our privacy which we find to be totally unacceptable.
