About this product

These beautiful Low Profile WoodStone Bat Boxes have been designed to complement any building and can accommodate up to 15 common pipistrelle bats which are very sociable mammals and prefer to live in colonies. They are manufactured from WoodStone, a breathable and insulating material made from concrete and FSC Certified wood fibres. WoodStone is designed to be robust and hard-wearing, providing a warm and stable temperature for summer bat roosts. There is a landing ramp and rough interior surface to enable easy movement around the box, and the front panel is removable for inspection and cleaning.

The Low Profile WoodStone Bat Box is designed to be attached to the external wall of a building but could also be attached to a tree. The box should be sited at least 3 metres above the ground to encourage bat residence.

Dimensions: (H) 440 x (W) 290 x (D) 90 mm

Weight: 4.7kg
