<p>This proposed change of use will bring a much welcome additional business to the village. At this time there is no physiotherapist in Meltham, and as such this will bring a unique business to the village. Since the loss of the Yorkshire Building Society some time ago now, this building has lain empty with the 'For Lease' signing hanging over the front of the building. I had feared that this area of the village (it is on the periphery) would not be an attractive location for another business to locate to, however, this proposed business will occupy this vacant commercial building, bringing it back into productive use and ensure the vibrancy of the village core. It will also also provide a business that can and will be used by local villagers for their benefit.</p> <p>I fully support this application and look forward to it being approved so the vibrancy and attractiveness of this unique village can be retained.</p>
