I would like to make this comment about above application

The maps and aerial view supporting this application are outdated. To make an informed decision all supporting documents should be current.

The aerial view is of the site proposed but does not show _____ and
feel this needs to be shown to correctly evaluate the application. The property as it stands is
_____ out of scale compared to other properties in the vicinity and feel further
development to this property will only add to this so accurate and up to date plans, drawings and
photographs are needed to assess the application correctly.
