1. Introduction

Via Solutions has been appointed to carry out the preliminary design of the highway works associated with the provision of a new site access and pedestrian link for a proposed residential development located on land off Fernside Avenue. The Highway Authority (Kirklees Council) has asked for a Stage 1 Road Safety Audit to be carried out of the proposed highway works.

The proposals have now been subject to a Stage 1 Road Safety Audit dated February 2019 carried out by Optima Highways. The 'Problems' and Recommendations' from that RSA are included in this Designer's Response report for ease of reference.

The revised drawings produced by Via Solutions (which take account of the details set out in the Designer's Response) are listed below:

1901501 – Proposed Access

1

2. Items Raised in Stage 1 Road Safety Audit

Problem: Proposed Pedestrian Link

Location: To the rear of existing dwellings along Fernside Avenue

Summary: *The gradient of the pedestrian link could contribute to pedestrian slip/trip accidents in icy conditions.*

Recommendation

It is recommended that the design of the pedestrian link minimises the gradient, crossfall is provided east to west and the requirement for a fence/barrier is reviewed at the detailed design stage.

2

Designer's Response

Recommendation accepted – A review of the pedestrian link will be undertaken at the detailed design stage.
