10th April 1991

Dear Sirs,

COAL MINING REPORT

RE: Netherfield House, 12 Riley Lane, Kirkburton, Huddersfield.

Thank you for your letter dated 27th March 1991.

The details given below indicate the mining position as it affects the site to which you refer.

PAST UNDERGROUND COAL MINING

British Coal have no record of any coal mining within the vicinity of the property. However, the property is in an old coal mining area where coal is present at very shallow depth and there is no guarantee that our records are complete.

PRESENT UNDERGROUND COAL MINING

There are no workings presently taking place within influencing distance of the property.

FUTURE UNDERGROUND COAL MINING

No future workings are envisaged - the site lies outside the currently active coalfield.

SHAFTS AND ADITS

The property is clear of disused mine shafts and adits shown on our records.

SURFACE GEOLOGY

The property is clear of such faults as are recorded on plans held by British Coal.

OPENCAST COAL MINING

In addition to underground mining operations, British Coal also prospect for and work coal by opencast methods. The property subject of the enquiry is within the general area of current open-cast interest.
