Type of comment: A general comment
As the application implies it is building on existing bushcraft activities I am not sure whether the camping facilities are being provided for bushcraft participants or whether the site is being developed as a commercial campsite. I am assuming that if it's the later there may be a slightly larger increase in noise and disturbance. I am also not clear from the application what artificial light will be used on the site and/or what times this would be operational. Currently external lights from properties to the rear of Green Bower up to the Colne River and on the adjacent mill cause an increase in light pollution to my property and I would not want this to increase particularly during the hours of darkness. If this may be a consequence of the proposed application then I would like to object to that aspect of it.
