Responding Ref:

I have no objection to the proposals for the site. The trees affected by these proposals would not warrant protection by a TPO and appear to be pioneer species that have taken advantage of the disuse of the site. As such they have developed with poor forms and defects or been poorly pruned. Their removal can be mitigated for by the planting of better quality specimens within a soft landscaping scheme for the site. Any replacement trees should be of an appropriate species for the future site use.
