Type of comment: An objection
I want to object to this development. There are no benefits to building houses on this land. Alternative accommodation is available locally and there is not a shortage of houses. The woodland here has developed into a natural environment which has lots of valuable trees and animals. The intention to build 4 unneeded houses will be damaging to the plants, animals and have a negative effect upon the residents. It will not be possible to avoid being overlooked and the value of properties could be affected as a result. The additional traffic during building works on such a narrow street is a concern as is the noise and disturbance it will cause. The plan to build houses on the slope will also impact upon residents on the other side of the development who will also suffer from being overlooked. Parking on this road is already a problem but it would be unmanageable during building works and then afterwards as the new houses would need to access their parking in an area with limited visibility. This project does not have any benefits.
