What is the application for?:	Outline planning permission for erection of residential development
Address of the site or building:	east of, 28, Northorpe Lane, Mirfield, WF14 0QN
Postcode:	

User comments

Type of comment: An objection
I wish to object for the following reasons: Residents on Northorpe Lane are required to park on the road as there is no off road parking. This means that for long stretches the road is narrow and affords only single file traffic. This becomes chaos on a daily basis with school runs and causes gridlock on Northorpe Lane, Crossley lane and Shillbank lane. The junctions at Crossley Lane and Shillbank Lane are both blind because of parked vehicles and there have been numerous near miss collisions that I have witnessed. If an additional 96+ vehicles use these roads on a daily basis, there is an increased risk of both vehicle and pedestrian accidents (School children for three schools cross at the junction of Northorpe Lane and SHillbank Lane). Additional housing and residents are already putting a strain on our overstretched services in Mirfield. The road on Northorpe Lane is in really poor condition and will struggle to cope with the additional traffic from a new development. Kirklees have already stated that they have insufficient funds to improve it!
