To who it may concern.

Kirklees Planning application 2019/92486

I have concerns about the health and safety of anyone passing under this tree due to the condition of some parts of the tree. I am also concerned about the potential damage to the vehicles and property located under the tree.

One half of the tree is leaning towards a neighbours property, it is currently only 14cm / 5.5 inches away from the property.

Root damage to the neighbours property is also a concern.

A failure could also disrupt telephone data and internet services to several properties due to the location of the cables under the tree.

As a preventative measure and in the interests of health and safety / risk of damage to property I ask the council to grant permission for the removal of the tree.

I will then proceed with the removal of the tree without delay, before the winter season.

I will then plant a replacement tree in a more suitable location.

Regards
