Address of the site or building:	adj, The Noddle, Halifax Road, Scapegoat Hill, Huddersfield, HD7 4NS
Postcode:	HD7 4NS

User comments

Type of comment: An objection
<p>Further to my recent objection (FS – Case-146703486 28/09) I would also like to express concern for the impact that the development will have on the far reaching views of Scapegoat Hill and its general green and openness.</p> <p>If the development should be considered as an exception and have some special circumstance for approval as defined within the Green Belt within the Kirklees Unitary Development Plan. I would be interested to see AVR's (including report, survey and methodology at level 3 for accuracy) from a number of key locations which are quite likely that you would see large parts of this development from. Especially plots 1&2 & 3, 5&6. The plan highlights locations that you can currently see the site (from the top of Scapegoat hill they are from the public path - you can see the existing roof ridge line and trees on the development site) so it's safe to presume with such big 3 floor buildings, set above the road line that you would also see the houses from these locations which would have substantially visual impact for the Hill as a whole.</p>
