About this product

The 2F is the standard and most popular Schwegler bat box. It is ideal as a starter box to see if there are bats in your area or to provide much needed secure roosting space. It has been designed as a summer roosting space for bats and has a simple entrance hole at the front. The Schwegler 2F has a removable front panel and can be converted to a bird nest box using a replacement 1B front panel (<https://www.nhbs.com/1b-schwegler-nest-box>) if there is no evidence of bat activity after a couple of years. The 2F is manufactured from long-lasting woodcrete, which is a blend of wood, concrete and clay which will not rot, leak, crack or warp, and will last for at least 20 - 25 years, making it suitable for long-term mitigation projects. Woodcrete is breathable and maintains a stable temperature inside the box and the 2F is painted black to absorb warmth. It also provides a rough surface for bats to cling to and climb up.

The 2F bat box can be sited on a tree or building and is best positioned at a height of between 3 to 6 metres in an open sunny position. A group of 3 to 5 boxes facing in different directions will provide a variety of micro-habitats. Please note that once bats have inhabited a roost site they may only be disturbed by licensed bat workers.

A replacement front panel (<https://www.nhbs.com/front-panel-for-the-2f-schwegler-bat-box>) is also available.

Height 33 cm x diameter 16 cm. Weight: 4 kg.

Aluminium tree-friendly nail and hanger included.

Specification

- * Height: 33cm
- * Diameter: 16cm
