Subject: Planning Application 2019/93730 and 2019/93731
Date: 23 December 2019 16:50:59

Sirs,

Planning Application 2019/93730 and 2019/93731
Removal of Previous Restrictions.

Further to your letter of 29th November, requesting objections/comments by 24th December 2019, herewith my comments :

Previous permissions have stipulated restrictions 'so as to protect the interest of adjoining residential properties' – noise, either continuous monotonous output from the factory or individual light and heavy vehicle movements are both significant issues. Environmental Health's recommendation, in respect of the application, of restricted hours of movement confirm that noise issues are, and will, continue to be a problem. Were consideration to be given to granting permission then, given previous failures to adhere to planning restrictions, it is important that any conditions are effectively enforced.

-

Shepley Spring's recent offers to install triple glazing to individual south and east of the site and acoustic screens to the boundary of their property indicate an acceptance of a serious noise issue. Note : Given the arc followed by free noise, screens would be of little use. It is important that noise be contained at source or not allowed to develop.

Permission should not be granted for parking to the south of the site.

Sincerely,
