I am replying to this planning application .I have been advised of it by one of my neighbours in the Copse. The Copse is a small development in a Conservation area with properties evenly spaced to a similar design appearance and layout.We have had the benefit of living there since most of the properties were built in 1984.It's been an environment of no walls and fences with a focus of care for our natural surroundings.Tree preservation has been a priority as you would expect in "The Copse" The houses were built in Yorkshire stone with a later addition built in sympathetic material. In this context on viewing the plan on your website,the proposed development of a 5 bedroom detached property in a confined area set against what exists now and to a design which appears to be unsympathetic to the rest of the Copse is disappointing and upsetting. It would be helpful if you could acknowledge this response so that I know my views have been received in the event that I need to contact you again through your website.Thank you.
