Subject: Propose Development of Parkwood Methodist Chapel, Longwood
Date: 14 March 2020 16:55:03

Dear Sir or Madam,

as a resident of the area of this application (number 2020/90479) I am very concerned about the effect on the surrounding area.

- I am particularly concerned about the proposed use of the present front grassed area/ graveyard as a car park. This would adversely affect the views of the chapel from the Dodlee lane and Grove street areas. These are the main views of the listed chapel which is also in a conservation area. If the graveyard is to be used as a car park I propose that it should be screened from view, possibly with a higher matching stone wall at the front.
- The bin storage area: I propose that this should not be visible from Grove street and Dodlee lane or it should be suitably screened and built to fit in with the surroundings (listed building and conservation area). There is also a concern that the emptying of the bins could cause disruption to local traffic and/or disturbance to local residents.
- I am concerned that the proposed entrance/exit to the chapel is very tight and would not be suitable for vans and larger vehicles; this would be especially relevant during the construction phase.

Yours Sincerely,
