Hello

I'd like to note an objection to the application 2020/90630, Lewisham Road and I am concerned about the possible damage that the proposed extension will do.

Our house has been suffering excessive damp due to the tarmac already there. I am concerned that this will be exacerbated by the extension and the building work.

I am also concerned about any foundation work of the extension effecting my property as my house has already suffered from sever subsidence and has had extensive underpinning work.

I'd like to discuss this further before any building work takes place and would like to have

Happy to discuss further in due course,

Kind regards,
