What is the application for?:	Erection of 74 dwellings with associated access, parking and open space
Address of the site or building:	Land at, Penistone Road, Fenay Bridge, Huddersfield, HD8 0AW
Postcode:	S63 7ER

User comments

Type of comment: An objection
Our village has grown tremendously over recent years with a huge development at Fenay Bridge Park and numerous other developments. There will be a significant increase in the volume of traffic in the area. The roads are already congested and it is difficult to get out of the village onto Penistone Road, Station Road and Wakefield Road at various times of the day, with queues and long delays in the direction of Huddersfield. The amount of traffic on Rowley Lane at school pick up and drop off times is totally unacceptable and causes difficulty traveling around the village. This development will just exacerbate matters. The infrastructure is already insufficient to support the volume of traffic. This development would result in many more cars in the area and cause more bottlenecks, frustration and delays for residents. I am concerned that there will be more accidents with an increase in traffic in the area. The increased population in the village would put more pressure on schools and other services such as surgeries, which already seem stretched. There will be a lot of noise, disruption and inconvenience for residents with the construction which will go on for a considerable length of time and cause distress to residents. We would lose even more of the natural environment, open space and countryside. Much has already been lost in recent years what remains should be protected. With the Covid 19 situation the importance of our countryside and open spaces for exercising has been highlighted. We need to protect the open countryside to be able to walk and exercise dogs. We have had too much development in the area already and have lost much of the natural village feel that the residents value and wish to try and maintain.
