Subject: Planning application number 2020/62/90942/W
Date: 09 June 2020 21:03:39

Dear sir/madam,

I would like to object to the above named planning application.

As a local resident in the Ainley Top area I have significant reservations of further proposed residential building work.

Over the recent months here has been significant building work on greenfield sites in the region of the Grimescar valley. This is in addition to extensive residential and industrial building work over the past 3 years nearby in Lindley.

There is already considerable pressure on the local infrastructure, particularly the Ainley Top roundabout, in which an increasing number of motorists and road users are using local (non a road) routes in order to avoid the ever increasing traffic on the main routes to and from the M62.

Further residential building will invariably result in more local traffic on smaller roads, leading to worsening air quality, noise and light pollution.

Furthermore there is no planned expansion for local amenities to accommodate new residents such as school places, GP practices and dental surgeries.

Clearly this proposed application is unsuitable and should be rejected.

Yours faithfully,
