What is the application for?:	Outline application for erection of residential development
Address of the site or building:	land west of, Wesley Avenue, Netherthong, Holmfirth, HD9 3UL
Postcode:	

User comments

Type of comment: An objection
The village infrastructure does not support additional residential development. The proposal will increase traffic and the village does not have sufficient public transport links. This will be further reduced by the Covid 19 pandemic with existing public transport reduced capacity. Traffic will be impact on the small and narrow roads around the village. There is an increased risk of RTA particularly as there are no pavements on many of the narrow streets through the village. There is no doctors surgery or pharmacist in the village and access will require travel to Holmfirth or Meltham by car. The proposed location is on a green field site and this impacts on the environmental and wellbeing benefits of green space to local residents.n There would be a significant environmental impact on the local landscape. The school cannot support additional pupils and classes and again older children would need to travel to Holmfirth High School increasing traffic. .
