Address of the site or building:	Land at, Green Acres Close, Emley, Huddersfield, HD8 9RA
Postcode:	

User comments

Type of comment: An objection
I would like to strongly object to this application as it is not a sustainable development for the following reasons: -There is insufficiency capacity at Emley school to take more children, with a development of this size there are likely to be many more places required. -The road infrastructure of the village already appears to be working at capacity and at times is straining. This development is likely to yield 100 cars, that will add to the current stresses. There are no employment opportunities in the village and given the limited public transport available and The topography that is likely to preclude cyclists the new occupants will need to drive for employment in addition to transporting their children to school outside the area. -I also have concerns about the impact of the development on the Millennium Green. This is a peaceful space that is well used and treasured by villagers, the layout of the houses appears to prevent easy access/ right of way to the space and will pose visual intrusion. -I also have concerns about the Safety to pedestrians and other road users of the Wentworth Avenue/ Beaumont Street junction, there is a bus stop very close by and cars usually park directly opposite, preventing the free flow of traffic, the increase in traffic movement that will exist at this juncture will create more frustration and increase risk of accident. -I am also concerned that this application is intending to make use of the access to Green Acre Close as vehicular access, after all the application is named after this street!! I believed that this point had been proven that Green Acres and Warburton were unsuitable for an increased traffic load!!
