

Subject: RE; Planning Application 2020/62/91337/W

Dear William,

Further to our telephone conversation on Friday 7 August, I write to confirm my request for consideration when you review the above planning application.

. Given the proximity of the proposed development to my property, I write to request that a 2m fence is erected by whoever builds the house as set out in 2020/62/91337/W and request that the fence is erected in advance of any building work commencing. The request is made to maintain and secure our current level of privacy in both my house and the garden area. Given where the properties are situated (in an elevated and exposed area), the fence would have to be a windproof.

I understand from our conversation that it would be incumbent on whoever built the house to provide the aforementioned fence.

Can you please ensure your reply is copied as above.
