Address of the site or building:	Former scrap yard, adj Canalside West, Firth Street, Huddersfield, HD1 3DB
Postcode:	HD1 3BL

User comments

Type of comment: An objection
The area in front of Firth Street Depot is inadequate for the high number of deliveries throughout the day. Some vehicles reverse in, causing disruption to the flow of traffic, others are too large and park on the roadside. This would severely restrict the safe access and egress of users of the proposed car park. I believe it would be safer if access to Firth Street Depot was gained through the proposed car park. The car park at the other side of the 3M Buckley Building, which also employs automatic barriers, has a low timber boundary fence which is preferable to an unsightly 2m high mesh fence and would enhance sighting along Firth Street for safer access and egress. What happens to the current footpath which runs from King's Bridge Road, along Commercial Street and finishes at Firth Street. This footpath is well used, especially in term time, by people from the nearby student accommodation, car parks and local residents walking to the university and town centre.
