

Ms Louise Bearcroft
Kirklees Planning

Dear Ms Bearcroft,

I am given to understand that the owners of The Dunkirk are applying for permission to extend their premises to further the possibility of more local social functions.

I think personally this would benefit our community not only for the fit and able but for the older generation and those who cannot travel far to meet up and not feel isolated. Especially given the fact that even in their new restaurant they will provide a lift for those not able to climb stairs, but better still providing hopefully more space down stairs for those who just want a snack and somewhere to catch up and also to provide meeting space for events for institutions to hold such meetings.

Finally, they are providing much more in employing local people and using small business and organisations such as ours, which is fundamentally crucial to Kirklees Area.

I fully support this application and the benefit that these improvements will bring to the community. I wish them well and hope they achieve their goals after all the hard work they have already put into The Dunkirk Inn.

Yours sincerely
