Subject: Development North Bierley Water Works BD12

Good morning

I would like to put in an objection regarding the development of the above site.

In view of the heavy traffic turning from Bradford Road onto Mill Carr Hill & the access to the site on Cliff Hollins Lane this proposal is totally dangerous & unwanted in this area, the traffic will also be in the close vicinity of a first school & poses a danger not only to the young children but also to the parents & guardians who escort their children too & from the school on a daily basis.

Oakenshaw is a village & Cliff Hollins is a country Lane not a motorway, walkers, cyclists & horse riders use Cliff Hollins Lane on a daily basis it is not built for HGV's & the heavy traffic it will produce as a result of this development, it will be a disaster waiting to happen.

To avoid any tragic accident occurring I strongly object to this development going ahead.
