This is an excellent opportunity to provide off street parking, by removing a small section of old wall. It's not the entire wall only a 5 metre section Townhead has a serious parking problem, most of the houses have at least 1 car, some 3 cars, there is not the capacity to park all the vehicles. Today 5th August the refuse wagon did not collect the bins on townhead because cars were blocking access. This application will also make the courtyard access for the adjoining terrace houses very easy, they have great difficulty driving into there properties. There is an undertaking on the application the wall and parking area will be created using existing materials in keeping with a conservation area. No modern out of character materials will be introduced, This is probably the only property along townhead with enough space to create easy parking access. So really a one off opportunity. I encourage passing this application.
