Subject: Comments on application 2020/92095

Head of Planning and Development

Ref: 2020/92095

I am writing to you with regard to this planning application

I have reviewed the planning documents for the proposed development and note the following:

1. The extension will be quite overbearing
2. The extension will not be in keeping with the properties of a similar construction date/style on Grange Avenue that have hipped-roof lines and not gable-end (see attached picture).

The extensions would be at least slightly considerate to the area and those occupying the neighbouring properties if hipped-roof were used.

You can write to me at this email address if you require further comment or clarification.
