Subject: Planning Application 2020/92307

Kate,

With reference to planning application 2020/92307.

I object to the application on the grounds of flooding.

In March of this year extensive flooding took place in the area of Fenay Bridge. I had a meeting with Kirklees which informed me that instead of one in hundred fifty years chance of flooding because of the new information due to climate change we were now one in thirty years chance of flooding.

Therefore any loss of space and the pressure of new houses on the water network in the area will just add to the danger of flooding for the existing properties.

In conclusion this development should be rejected on the issue of flooding alone..
