<p>First of all i understand the need for more houses in the Kirklees area is significantly high. However the development in question will cause significant implications to current residents and the local area.</p> <p>First of all the sheer amount of homes being built is huge, currently the area does not have the infrastructure to be able to accommodate such a large volume of homes and the accompanying needs of these individuals. Access to both primary and secondary schools, GP surgery's. Ect</p> <p>Furthermore the environmental impact, not just from completely destroying a significant portion of the green space in the area, which is frequently used and beneficial to the local community not only for exercise ie walking and running, cycling but also for individuals to explore the local area and the wild life and habitats that occupy this area. Green spaces can have a significant impact on people mental health and having access to such areas is vital.</p> <p>Also to add the current noise pollution and traffic in the area is high Leeds roads being extremely popular. This will likely only increase congestion and road traffic collisions in the area and also worsen the pollution by the increase of cars on the road.</p> <p>Finally, the area in recent years to present have seen a significant number of new developments within a mile of each other. Keepmoat/ Linden homes and Barrett homes.</p>
