What is the application for?:	Outline planning application for demolition of existing dwellings and developmen
Address of the site or building:	Land east of, Leeds Road, Chidswell, Shaw Cross, Dewsbury
Postcode:	

## User comments

Type of comment: An objection
<p>Dear sirs/ma'am I write to lodge my objection to this Proposal. I live close to the proposed site and am extremely concerned over the increased traffic noise, volume and pollution, in what is an extremely busy area anyhow. Leeds road is queuing traffic and race drag with a number of accidents. The areas to which the development are proposed are areas of natural beauty and wildlife. The area is frequented by many, I urge you to walk through the fields into the woods and saver the tranquil nature and observe the wildlife. Owls are recent in the area and can be seen flying in evening and night, where will these dying breeds go? Also the field mice and farming fields. A Longside this are all the trees which are a natural flood deference and in this ever increasing pollution age provide us with clean air to breath, without the trees we couldn't live, why take away the nature that helps us to replace with a concrete jungle when there are rumble and run down areas within Kirklees(Batley and Dewsbury) Which could be developed. Pls don't destroy the countryside we have. When will it stop? Councils are to pledge to environmental measures this area will have a huge impact on our green foot print.</p> <p>The roadways are suffering anyhow in and around this area and further development would lead to increased traffic and pollution ( more pollution with less Trees and green land to counter act this)</p> <p>Please don't dig up green spaces. Please think and consider elsewhere which is already delerick or in need of updating.</p> <p>I strongly object to huge disruptive unnecessary development. This area has been heavily developed over the years to the suffering of the networks and environments. The demand on local services is under strain and this development would add to that. The pollution and air quality health conditions which this development cause can not be underestimated.</p>
