

About the application

Application number: 2020/92331	
What is the application for?:	Outline planning application for demolition of existing dwellings and developmen
Address of the site or building:	Land east of, Leeds Road, Chidswell, Shaw Cross, Dewsbury
Postcode:	

User comments

Type of comment: An objection
<p>The increase in traffic and fumes will be detrimental to local health and mental wellbeing, not only through increased fumes from traffic and noise but loss of natural habitat which cleans our air. It will put immense pressure on local road networks already congested with pot holes which cannot be afforded to be fixed but cheaply patched for a few months. Congested roads will add more stress to local travel and the commute. If there is more congestion how can kirklees become more environmentally friendly? There will be even less space to encourage cycling and no room for families and commuters to possible cycle safely with no room for added cycle lanes. Where is the high school to accommodate the extra children? Extra houses have already been built at bywell which will fill the local high school. The government states we are causing so much damage to our world and change is needed with cleaner air to aid wellbeing and improved local health which in turn will reduce the huge impact on our NHS and cut costs, surely this plan will not do that but cause added stress to those already living locally and therefore in turn, potentially impact on local health and mental wellbeing and increase the costs to our NHS through the decreasing health of its current occupants.</p>
