---

This planning application is very close to my address as is stated in the letter which I have received. It is beyond all comprehension that this amount of dwellings, including a school, can be built with all the forthcoming traffic that this will create, being fed directly onto Leeds road. Leeds road is already unable to cope with the traffic which travels along this road, already resulting in build up traffic every day, therefore I would like to strongly object to this planning application which would lead to unimaginable amounts of traffic on this road. Not to mention the amount of air pollution it will create and damage to what is already bad air quality.

Best regards
