| <p>This site has much loved footpaths and wildlife which should not be destroyed. During the covid pandemic the importance of green field space has become more evident. Walking in these fields and woods On a daily basis has been the thing that has made the difference mental health wise. I could easily have sunk but the increase in mood was evident after every daily walk.</p> <p>The planning does not say where children of secondary age would go. Woodkirk and Osset schools are over subscribed. There is a shortage of facilities for the existing population and in normal times the roads are already gridlocked at rush hour. It is a frequent accident hotspot. Tingley roundabout is already far to busy.</p> <p>We do not need new housing to be built on green spaces. There are plenty of brownfield sites available. However the impact of local services ,infrastructure and schools of those too Needs careful consideration. Please don't take our walking spaces away. This won't be our last pandemic and green spaces not only decrease transmission rates but also provide much needed peaceful places to escape from our four walls. Removing them will create a suburban sprawl which makes villages lose their identity and community spirit. Please leave our green spaces alone</p> |
