| <p>I have a sump pump under my Bungalow and a constant stream under my property. My Garden is a sponge at the same level as the fields. With the proposed Units being built close to my property and laying of concrete pads the water table is bound to rise putting risk to my property and personal stress to myself and neighbours.</p> <p>With the constant traffic noise and congestion / Fumes from Leeds Road traffic we are now going to be an island between a Major road and factory units with Production and heavy vehicle noise / Fumes.</p> <p>The loss of green space which in the current climate has been a blessing to so many to be able to get out safely and walk, cycle, Exercise helping their physical and mental health.</p> <p>The proposed building P3 will be directly behind our property as mentioned we are the lowest and will lose the morning Sunlight as a shadow will be cast for a good time across our property, looked in from the units / offices.</p> <p>I would have thought the local councillors would have at least knocked on our doors to hear see face to face our concerns on what you are voting on.</p> <p>Traffic builds back past our house the bottle neck by Shaw Cross playing fields and a potential of 2/3000 at least more vehicles it will become gridlocked and the new estate a Rat Run to cut through. The M1 /62 Junctions local to the site are regularly closed by accidents as now the A653 will be solid with traffic.</p> |
