<p>Disappointing development within Greenbelt which encourages Urban Sprawl. The proposed scheme looks ill thought out with very little public green space especially given the recent press surrounding climate change and the need for sustainable design. The development will put lots of pressure on local amenities and give very little back to the surrounding areas other than high volumes of traffic. Would be keen to know where section 106 contributions are going....</p> <p>Surely in this day and age we should be encouraging green design, however the housing associated with this masterplan is more akin to a 1950's council estate. I object to this scale of development.</p>
