<p>our local infrastructure is overloaded without the addition of another 1300 homes.</p> <p>and further CO2 being pumped into the already severely congested roads increases the Health threats to children .</p> <p>located on the A653 it does not need more cars sat in traffic outside their playground dumping CO2 into their lungs.</p> <p>The land your trying to remove acts as a zero carbon emission "green lung" . This beautiful area separating Kirklees, Wakefield and Leeds and offers us a green space in what's becoming an over polluted area. If you permit these developers to building on Chidswell your further increasing massive urban sprawl with communities. Our area will lose its vital rural area and blend 3 areas into one</p> <p>Our Kirklees schools are operating at capacity with no plans by Kirklees to build new schools. The same is said for</p> <p>Doctors' surgeries and public amenities would be unable to cope with such a rise in population and while we need more social distance when the current pandemic has no end in sight.</p> <p>The noise pollution has increased over the years and this plan would further impact negatively on our life.</p> <p>This development from is contrary to the Government's National Planning Policy Framework which supports health, social and cultural wellbeing. We have chosen to raise our child in an Area which was not overcrowded and had areas we could explore and walk where nature was left to grow and we can observe and find well being from the calm these beautiful walks offer. To remove this piece of countryside from our family is a travesty. We should be able to live in an area that is not an urban sprawl of houses and some manufactured recreational area. Children need countryside and green and pleasant lands to enjoy. Its what makes England so unique</p>
