Address of the site or building:	Land east of, Leeds Road, Chidswell, Shaw Cross, Dewsbury
Postcode:	

User comments

Type of comment: An objection
<p>This destruction of this area is unjustified. It is home to a variety of wildlife including . We need green space and we have enjoyed this during the lockdown. We need this area to protect the planet. These fields grow crops to eat, so destroy these and build, then people will starve.</p> <p>The traffic is also going to increase and I have to sit in this queue on route to work. It is a bottleneck now so it will only get worse. After the evening rush, this road becomes a race track so speed cameras are desperately needed. All the extra C02 which the current residents will have to breathe in. Will you compensate them when they health deteriorates.</p> <p>. When it was made into dual carriageway then they had to have a pump fitted underneath their property.</p> <p>So will Kirklees be covering the insurance on these when the water has nowhere to go. Will you also be making up the difference on the valuation of all properties that lose value? will be locking onto commercial units and that won't be great as there view was beautiful fields.</p> <p>I think you could find some brown land to use first or utilise the town centre of Dewsbury. It works in other city's and towns. This would bring Dewsbury back to life with flats and apartments. It would also create jobs with bars and restaurants. There is also small areas of land in Earlsheaton Greenwood Ave and Station Road which have more routes out for traffic. What about Forge Land Thornhill Lees? These smaller area would work better for traffic, schools, doctors etc.</p> <p>I am sure if you did a bit of homework you could find some where more suitable. Just leave Chidswell intact.</p> <p>I am appealing to someone with a heart and a conscious.</p>
