5-09-2020

To Matthias Franklin,

I am writing to you with serious concerns about the proposed development east of Leeds road & Clidowell Shaw Cross

I have a list of concerns which includes the following —

The loss of wild life & protection of ancient woods and hedgerows

The loss of green belt land which I cannot understand, when the prime minister is saying it should be protected at all costs and build on brown field sites

How on earth will we cope with the volume of traffic which at times is dreadful anyway, Clidowell Lane is already used as a race track also the exhaust fumes are horrendous.

I have lived in Clidowell since

I have seen many awful changes in this time - I wonder what else you can do to ruin it!!!

The proposal entry from Clidowell June - I tried to think of the serious problems this will cause.

I have already had difficulty, at peak times

There are too many proposed developments/projects in North East Kent/Essex. Wouldn't it be better to develop Dawsberry town center first!

<sup>please</sup> I beg you to reconsider the proposal plan. Once this is done the lands gone for ever. We really should be preserving our precious green belt land

Also will the coal be extracted or remain in situ as per 203-206

Yours Faithfully
