<p>There are several different wildlife that live in the area (i walk there regular so know) especially the thousands of frogs that spawn in the ruver and moe up in to the fields and woods. Leeds road on a morning and evening is chaos as it is.if there are over 1300 dwellings that means over 1300 additional cars commuting in that area at peak times. The national grid has advised nothing is built under their power lines so it is a health and safety hazard. Highways has also said this is a bad idea. Why is the application allowed to go ahead when other very similar (if not exactly the same ) have been denied in the past? There are also MANY trees in the area. We are supposed to be protecting our planet. Im sure that cutting down 100's of trees and using heavy machinery wont help.</p>
