Subject: Application no. 2020/92331
Date: 09 November 2022 19:12:16

We are objecting to the planning application above due to the massive increase in traffic that will be on the A653 caused by the development, the road is already an accident black spot and is already congested regularly. The loss of wildlife and farmland which produces crops for food. The ancient woodlands will die due to water being redirected by building work. The environmental implications for the surrounding areas will be irreversible and the damage caused will be permanent. Any problems on the local motorways will cause gridlock even worse than we already do and will cause traffic chaos for miles. We cannot afford to ruin this area of sustainable food production and woodland we need to protect them instead of building on them and look at all the brown field sites and derelict areas that are a more sensible option.
