<p>From my point of view, this project will be highly prejudicial to the area, for many reasons but to outline the most important ones:</p> <p>1) Damage to the ecologic system of the area: the woods around these areas are home of endangered species and will impact these and the local wildfire in a very harmful way. I realized only recently that the Ecological Impact Assessment for the area is outdated and was performed in sub-optimal conditions to say the least, by a member of staff employed by the Land Owner, so with direct interest on the result.</p> <p>2) Loss of Agricultural Land - I shouldn't need to extend much on this matter, more houses in agricultural land is irresponsible governing. If we keep thinking importation will be the permanent solution for the primary sector, we will end up in the same boat as we currently are with the energy...</p> <p>3) Loss of green area with important beneficial effects on mental illness - the more we crowd the spaces, the more stress and mental illness we cause to the local population. This area does not have the required infrastructures to hold more population. More houses will create chaos on the roads, schools, healthcare...</p>
