To whom it may concern.

I would like to object to the proposed building plans Ref2020/92331 and also Ref 2020/92350.

This is green belt land and is the only bit left in the local area and while I realise that there is a shortage of houses we need to remember that green areas are needful for peoples mental and physical health,not everyone has a car and cannot drive into the country side.

Why not consider recycling the land sitting underneath empty houses and derelict properties not fit for purpose. Let's pull those down and reuse the perfectly good building land instead of taking the farmers land and homes of the wild life. What about the wild life who's going to speak up for them and plead their case, they need a home too.

Let's also think about Leeds Road already a very busy road how is it going to cope with the extra traffic especially when they close the motorways because of accidents and it all comes on to Leeds road.

What about the air pollution with all the extra cars that will come from the homes built in the area and the workers cars from the industrial properties,shops,schools,doctors etc.which will be needed for the families living in these houses, not to mention the extra traffic lights that will be needed on Leeds road to get the extra traffic out onto Leeds Road from the new area. This will also create a further build up of traffic on Leeds Road.

All of the above things mentioned will have a knock on effect that will impact on our global warming which is already in a very serious situation.

The import word in today's world is RECYCLE.
PLEASE let us recycle the building land and leave the green belt to the people and the famers and the wild life

1054 Leeds Road
