

If this planning application were to go ahead it would take the majority of our green fields in these areas, causing upset and misery to hundreds of people who have used this area for recreation in walking, running, bird watching and children from the local school brought down by teachers and helpers to see and hear what nature is about.

I see pheasants and other birds but also hares and rabbits not to mention the occasional fox.

There is also ^{pleasure} of walking through the number of woods in this area, seeing the different types of trees, this in its self is a great pleasure. but then in Spring the bluebells are a sight to see.

Last but not least the difference in traffic and congestion on the main road. There is the possibility that some houses will have more than one car of course, it would be a nightmare, it already is now, not only for traffic but for pedestrians trying to get from one side of the road to the other.
