Planning Appl. No. 2020 / 92331

Land east of Leeds Road, Chidswell, Derbyshire

TO WHOM IT MAY CONCERN

I wish to object strongly to the above Planning Application in respect of building works/industrial units that are intended to be carried out at land east of Leeds Road, Chidswell, Derbyshire.

My objections to the application are as follows:-

• Traffic and noise and pollution -

Amount of traffic it will cause on the A653.

It's already a nightmare when there has been an accident on the M62 (Jun. 27). With the

estimated 1,300 homes to be built, most

households have two cars per property, that

means an extra 2,500 (approx.) cars in the area, plus all the large wagons from the industrial units proposed, which is going to make the air pollution appalling for us residents. We cannot have windows open due to the noise and air pollution entering into our homes - Don't call THIS GREEN ENERGY Air pollution.

- Speeding cars racing one another. The amount of accidents on this road, we have had quite a few outside our bungalow over the years. At times we cannot get out of our driveway for the amount of traffic at peak times. This, I don't think is acceptable for a residential area.
- Green Belt: - Preservation of our green belt must stay. IF we intend to preserve what we have got in the way of open spaces and the beautiful area of outstanding natural beauty of our green belt, we must consider planning controls and not make it an area of urban sprawl (the only green belt we have in our area), for us to enjoy

especially it has been a god send during the coronavirus lockdown which has been used to its full benefit for residents and locals in the surrounding area.

- **Wildlife and Countryside Act:-** Its focus was on protecting rare species. Since then, there has been increasing emphasis on bio-diversity and the need to protect other forms of wildlife, common species of plant, animal and insect life. Common habitats such as hedgerows and meadows are also in need of protection which is there for all of us to enjoy and NOT to be taken away from us. May I also make a point of our green belt/countryside in terms of recreation and enjoyment. The countryside and green belt is a working, living environment and the source of our food. In the most liberal sense, we all live off the land, therefore, our farmland must be saved.

I want you to take these objections into consideration when considering the application.

All in all I strongly object to the above application, which will have a devastating effect on our lives in an area we thought was a lovely place to live in, does kindness care anymore!!

Yours faithfully
